

Manufacturer of Electric Heating Elements and Controls

## **Defrosting elements**

Our tubular heating element is a frequent alternative for defrosting. Tubular heating elements are used to prevent ice formation and to thaw ice in cooling and freezing units, air-conditioning plants, compressors and out door installations

### ***Examples of applications***

- Freezing and cooling equipment
- Compressors
- Professional kitchens
- HVAC

### ***Defrosting elements - technical info:***

Material	Stainless steel: AISI 304/EN 1.4301 AISI 316L/EN 1.4404
Dimension	Ø 8.2mm
Assembly	Fixing in the object
Connections	Silicon terminal – oil resistant cable Terminal box – M3.5, flat pin, round pin Plastic – wire connection
Design	Connection at one or two ends According customer specification
Others	Sealing: Silicon terminal, terminal box
