

Manufacturer of Electric Heating Elements and Controls

DELTA Fan Heaters

DELTA fan heaters are used in areas where materials and performance are in particularly high demand, for instance at construction sites and in ships. DELTA can also be used for more permanent installation in production floors, sports facilities, warehouses, garages, sunrooms, workshops and other facilities in which water, moisture or cold needs to be removed quickly and efficiently.

The DELTA fan heater can be changed from portable to fixed by mounting wall brackets.

We have a wide selection of standard models – call for further information about inventory and special designs.
